

## History – Movers and Shakers

In the Movers and Shakers project, your child will learn five statements from Dawson's model that will help them identify people who are historically significant and use the words year, decade and century to describe dates and times. They will study the life and impact of a significant person in the locality and of 10 significant individuals from around the world. They will complete in-depth studies of significant explorers Christopher Columbus and Neil Armstrong, and significant activists Emmeline Pankhurst and Rosa Parks and think carefully about the impact of their actions. The children will also carry out an independent study of a significant person from the past and learn about people who are significant today. They will also learn how significant people are commemorated and design a memorial for a person they have studied.

## Religious Education – Christianity

**Our key question is 'Is it possible to be kind to everyone all of the time?'**

This term we are focusing on Christianity with the main theme – What did Jesus teach? We will be learning to retell Bible stories that show kindness, and to explore how this makes Christians behave towards other people. We'll look at the stories 'The Good Samaritan' (Luke 10) and 'The Paralysed Man' (Mark 2).

## English

We begin our Key Stage 1 writing journey with the wonderful story 'Stardust' by Jeanne Willis and Briony May Smith. – a heartwarming story of a little girl who longs to be a star. With some help from her grandad, she discovers that we are all made of stardust, and we all shine in different ways!

The children will also bring home their first spellings of the year to practise at home in the first weeks of the new term, ready for Assessment in their tutor groups.

## Mathematics

Year 1 mathematicians will begin by recapping and revisiting Numbers to ten, sorting and grouping objects according to different criteria and exploring the composition and structure of 10 using tens frames. They will then dive deeper into learning about the part-whole model as a representation of numbers within ten.

Year 2 mathematicians will begin with a deep exploration of numbers to 100; they will use their growing understanding of place value to sort, compare and order numbers within 100 before exploring Addition and Subtraction – those number bonds they worked hard to secure in Year 1 will certainly come in useful here!

## Physical Education (PE)

## Personal, Social, Health and Economic Education (PSHE)

Key Stage 1 learning this term is based around 'Being Me in My World' and examines the question 'Who am I and how do I fit?' – perfect for settling into new classes!

# Be . Build . Become
